## NEW Stellar White Ink Series

Eclipse Low Bleed White

Lunar Cotton White

Cosmic Poly White

Mercury Low Bleed White

**Lunar Cotton White PADE1040** an easy printing high opacity white with excellent coverage and mat down on dark garments. The low tack formula allows printing through finer mesh counts without the need for a viscosity modifier. Use as an underlay where good opacity is needed, a stand-alone white or as a highlight white.

✓ High opacity    ✓ Great mat down

**Eclipse Low Bleed White PLHE1060** is a high opacity, low tack formulation which allows printing through finer mesh counts without the need for a viscosity modifier. PLHE1060 has good low bleed characteristics for printing on poly/cotton blends. Use as an underlay where great opacity is needed, a stand-alone white or as a highlight white.

✓ High opacity    ✓ Great mat down

**Mercury Low Bleed White PLHE1050** is designed for maximum smoothness and opacity on poly/cotton fabrics. Mercury LB White has excellent matting characteristics and a creamy consistency. PLHE1050 is fast flashing allowing for shorter dwell times and faster production rates. This low bleed white ink is great for both manual and automatic presses. Use as a highlight, a stand-alone or underlay white.

✓ High opacity    ✓ Excellent mat down

**Cosmic Poly White ATHP1060** is a good low temperature white with great opacity and when combined with Cosmic Barrier Grey (ATHP1550), has the best low temperature dye migration resistance on all 100% polyester performance fabrics in the market today. These distinctive low temperature cure inks have amazing stretch and recovery giving the prints a soft supple hand.

✓ Low Cure Temp    ✓ Bleed Resistant    ✓ Super Stretch
